Printavo Hub — Project Plan & Status

Mint Printworks · July 21, 2026 · One consolidated internal platform replacing 11 separate Printavo-connected apps

● **DONE** built, tested, reviewed ● **YOUR TEST** done, waiting on Tyler to validate ● **NEXT UP** agreed, starting now ● **TABLED** paused, will return
● **BACKLOG** logged, not scheduled ● **READY** unblocked, your call

Punch List — what's waiting on you

1. **Print Queue (PQ1–PQ3b):** manual printing, bulk status + rules, auto-print, packing slips & box labels — all built, none validated yet.
2. **Mint Bucks:** click through the 12 pages vs the standalone app. Also still need the **MINTBUCKS_APP_URL** value from you (QR & certificate links error until set).
3. **Task sync:** auto-sync is now LIVE (every 5 min, dev only) — watch it for a few days; check routed tasks, completions flowing both ways, safeguard pop-ups.
4. **Shipping tools:** try the Rate Estimator (needs its 3 API keys verified live) and the Label Sorter with a real slip + label batch.
5. **Reports:** backend validated? Reports UI + your preset-reports list are still queued behind that.
6. **Publish the Hub** whenever you give the word — no blockers remain.

Foundation — Sync, Backup & Reports

● **DONE** **Printavo sync engine + speed overhaul**
Everything mirrored to our database. Recent changes land within one 5-min tick; manual Sync Now ~70s; deep re-checks nightly.

● **YOUR TEST** **Order detail + payments history + Reports API**
Backend done (2017→today payments, legacy Insights formulas). Reports UI + your preset-reports list still to come.

● **NEXT UP** **Complete Printavo backup + scheduled resync**
Full archive of ALL data (beyond the 12-month sync window) on a schedule. You picked this Jul 21 — build starts now.

Vendor Orders / Purchasing — COMPLETE

● **DONE** **P1–P4 — Scan, cart, PO builder, Printavo push, electronic vendor ordering + tracking**
Needs-ordering scan, SanMar + S&S live pricing, warehouse auto-pick, PO Log with locks, write-backs, status suggestions. Live orders proven with BOTH vendors. PIN gate, kill switch, double-order protection, tracking dashboard.

● **DONE** **July 14–16 refinements**
Bulk vendor/pricing in cart, nickname-keyword status rules, PO Log description column, collapsible sidebar, S&S response fix.

Price Calculator (Breezy Quote port) — COMPLETE

● **DONE** **PC1–PC4 — Full calculator**
Matrices (+CSV import), exact legacy math, 10-col breakdown, vendor price lookup with sale toggle & smart search, PNG export.

Team & Access

● **DONE** **Staff login & roles**
Google/email sign-in, staff allowlist, admin vs staff roles, staff management in Settings, admin PIN in app settings.

● **YOUR TEST** **moMINTum task app inside the Hub**
Full task manager at "Tasks (moMINTum)" — same live database as the standalone app. Staff-gated; one-click nav both ways. Invites, TickTick & Missive stay in the standalone app.

Printavo ⇄ moMINTum Task Sync NEW — built Jul 19–21

● **YOUR TEST** **Two-way task sync — LIVE, auto-polling every 5 min**
Printavo tasks mirror into moMINTum with smart routing: your-staff-assigned → private; order-tied unassigned → Production list; the rest → General. Completions flow BOTH ways; tasks deleted in Printavo clean up their twins; order links included in notes.

● **DONE** **Safeguards & polish**
Confirmation pop-ups in the task app before completing/reopening/deleting/editing a Printavo-linked task (incl. bulk). Dashboard & list counts fixed to exclude the mirrored Printavo pool. First auto-cycle verified clean (210 scanned, 9 created, 8 completions synced, 0 errors).
Rule: auto-sync flag lives in ONE environment only (currently dev) — never both, or tasks duplicate.

Mint Bucks — store credit NEW — ported Jul 19

● **YOUR TEST** **Full port — 12 pages, same live database**
Dashboard, customers, credits, issue/detail, redemptions, rewards, reports, certificates, check credit, settings. Reward/order poller stays OFF in the Hub until you deliberately flip ownership from the standalone app. Emails redirect to you ([TEST→…]) until email mode goes live. Needs MINTBUCKS_APP_URL from you for QR/certificate links.

Print Queue (Workorder Manager port)

● **YOUR TEST** **PQ1 — Manual workorder printing**
Status filters, presets, combined print preview with per-order exclude, attachments toggle, packing-slip links.

● **YOUR TEST** **PQ2 — Bulk status change + queue rules**
Safe bulk moves (stale-order guard), rules with off/ask/auto modes, kill switch (default off).

● **YOUR TEST** **PQ3a — Auto-print to PrintNode**
Scheduled printing of new workorders + auto status move by decoration type. Double-print protection verified. Safe state: off + dry-run. Test with order #22251 only.

● **YOUR TEST** **PQ3b — Packing slips & box labels**
Rendered from our own data, no Printavo fetch. Zero-quantity placeholder lines are left off slips. Finishes the Print Queue module.

Shipping NEW — ported Jul 18–19

● **YOUR TEST** **Rate Estimator ("shipstimator")**
USPS/UPS quotes from ShipStation + EasyPost side-by-side, weight calc, preset boxes. Ported from your repo, Hub-styled, at Shipping → Rate Estimator.

● **YOUR TEST** **Slip / Label Sorter**
Sorts packing slips Style→Color→Size→Order# and pairs the USPS label PDF 1:1, + match report. All 9 presets + custom sort builder. At Shipping → Label Sorter.

Tabled — Returning Later

● **TABLED** **Cross-vendor catalog search**
"Navy trucker hat" search across SanMar + S&S with images; built as an API your other app can also use.

Going Live

● **READY** **Publish the Hub**
No blockers. Task-sync auto-poll flag is dev-scoped, so publishing is safe — we deliberately move sync ownership later if wanted.

Backlog & Ideas — Logged, Not Scheduled

Internal customer portal
Quick-access per customer: branding colors, popular styles, contacts, customer type.

External analytics hub
Fireflies, JustCall, Google Analytics/AdWords, Meta, RB2B, EmailAnalytics, ActivTrak, Constant Contact… roles in place for access tiers.

Maintenance & sidework log
With scheduled reminders; may tie into moMINTum.

Public Reorder Portal
Customer-facing reordering, after internal modules settle.

Color catalog / database
Hub-built color DB, reusable as the matching catalog for the Breezy app.

Sales & follow-up tools
Proactive follow-up reminders, receivables tracking, custom alerts (order value, customer type, new customer).

Outgoing activity log
One audit trail of everything the Hub sends out — what, when, success.

Knowledge base — FAQ, SOPs, reference
Centralized internal docs, structured for AI & platform integrations to use.

Preset reports library
Batch of ready-made reports — working from your list.

Missive messaging portal
Inbox / messaging inside the Hub via Missive's API.

Since last report (Jul 18): Shipping tools ported (Rate Estimator + Label Sorter) · Mint Bucks fully ported · Printavo ⇄ moMINTum task sync built end-to-end and now auto-polling · count fixes · "Printavo tasks sync" moved out of backlog — shipped. · **Testing rule in force: order #22251 only; #19004 never again.**
