Printavo Hub — Project Plan & Status

Mint Printworks · July 18, 2026 · One consolidated internal platform replacing 11 separate Printavo-connected apps

● **DONE** built, tested, reviewed ● **YOUR TEST** done, waiting on Tyler to validate ● **PLANNED** agreed, not started

● **TABLED** paused, will return ● **BACKLOG** logged, not scheduled ● **READY** unblocked, your call

Foundation — Sync, Backup & Reports

● **DONE** **Printavo sync engine + speed overhaul**
Everything mirrored to our database. Recent changes land within one 5-min tick; manual Sync Now ~70s; deep re-checks nightly.

● **YOUR TEST** **Order detail + payments history + Reports API**
Backend done (2017→today payments, legacy Insights formulas). Reports UI + your preset-reports list still to come.

● **PLANNED** **Complete Printavo backup + scheduled resync**
Full archive of ALL data (beyond the 12-month sync window) on a schedule.

Vendor Orders / Purchasing — COMPLETE

● **DONE** **P1–P4 — Scan, cart, PO builder, Printavo push, electronic vendor ordering + tracking**
Needs-ordering scan, SanMar + S&S live pricing, warehouse auto-pick, PO Log with locks, write-backs, status suggestions. Live orders proven with BOTH vendors (SanMar shipped Jul 13; S&S order 74469826 Jul 16). PIN gate, kill switch, double-order protection, tracking dashboard.

● **DONE** **July 14–16 refinements**
Bulk vendor/pricing in cart, nickname-keyword status rules, PO Log description column, collapsible sidebar, S&S response fix.

Price Calculator (Breezy Quote port)

● **DONE** **PC1–PC4 — Full calculator**
Matrices (+CSV import), exact legacy math, 10-col breakdown, vendor price lookup with sale toggle & smart search, PNG export.

Team & Access — NEW since last update

● **DONE** **Staff login & roles (was the go-live blocker — now cleared)**
Google/email sign-in, staff allowlist, admin vs staff roles, staff management in Settings, admin PIN moved into app settings. Built + tested Jul 17.

● **YOUR TEST** **moMINTum task app inside the Hub**
Full task manager at "Tasks (moMINTum)" in the sidebar — same live database as the standalone app, so both stay in sync. Staff-gated; one-click nav both ways. Invites, TickTick & Missive stay in the standalone app. Duplicate-member race found & fixed during testing.

Print Queue (Workorder Manager port)

● **YOUR TEST** **PQ1 — Manual workorder printing**
Status filters, presets, combined print preview with per-order exclude, attachments toggle, packing-slip links.

● **YOUR TEST** **PQ2 — Bulk status change + queue rules**
Safe bulk moves (stale-order guard), rules with off/ask/auto modes, kill switch (default off).

● **YOUR TEST** **PQ3a — Auto-print to PrintNode**
Scheduled printing of new workorders + auto status move by decoration type. Double-print protection verified. Safe state: off + dry-run. Test with order #22251 only.

● **YOUR TEST** **PQ3b — Packing slips & box labels**
Now rendered from our own data, no Printavo fetch. Built Jul 16 — finishes the Print Queue module. Note: zero-quantity placeholder lines are left off slips.

Shipping — discussed Jul 18, not scheduled

● **BACKLOG** **Rate Estimator (“shipstimator”)**
USPS/UPS quotes from ShipStation + EasyPost side-by-side, weight calc, preset boxes. Full notes saved; needs repo re-shared + 3 API keys when we build it.

● **BACKLOG** **Slip / Label Sorter**
Sorts packing slips Style→Color→Size→Order# and pairs the USPS label PDF 1:1, + match report. Modern template — near-verbatim port. Needs repo re-shared; no keys.

Tabled — Returning Later

● **TABLED** **Cross-vendor catalog search**
“Navy trucker hat” search across SanMar + S&S with images; built as an API your other app can also use.

Going Live

● **READY** **Publish the Hub**
Staff login is done, so the old blocker is gone. The Hub can be published whenever you give the word.

Suggested next steps: 1) Test moMINTum + PQ3b (and PQ1–3a if not yet). 2) Publish the Hub — now unblocked. 3) Pick the next build: catalog search, shipping apps, or outgoing activity log. **Testing rule in force:** order #22251 only; #19004 never again.

Backlog & Ideas — Logged, Not Scheduled (sequence together when ready)

Internal customer portal
Quick-access per customer: branding colors, popular styles, contacts, customer type.

Color catalog / database
Hub-built color DB, reusable as the matching catalog for the Breezy app.

Knowledge base — FAQ, SOPs, reference
Centralized internal docs, structured for AI & platform integrations to use.

External analytics hub
Fireflies, JustCall, Google Analytics/AdWords, Meta, RB2B, EmailAnalytics, ActivTrak, Constant Contact… roles now in place for access tiers.

Sales & follow-up tools
Proactive follow-up reminders, receivables tracking, custom alerts (order value, customer type, new customer).

Preset reports library
Batch of ready-made reports — working from your list.

Maintenance & sidework log
With scheduled reminders; may tie into moMINTum.

Outgoing activity log
One audit trail of everything the Hub sends out — what, when, success.

Missive messaging portal
Inbox / messaging inside the Hub via Missive’s API.

Public Reorder Portal
Customer-facing reordering, after internal modules settle.

Printavo tasks sync
Explore tying moMINTum into Printavo’s own tasks (API supports it).
