Printavo Hub — Project Plan & Status

Mint Printworks · July 13, 2026 · One consolidated internal platform replacing 11 separate Printavo-connected apps

● **DONE** built, tested, reviewed ● **YOUR TEST** done, waiting on Tyler to validate ● **PLANNED** agreed, not started

● **TABLED** paused, will return ● **IDEA** logged, not scheduled ● **REQUIRED** must happen before go-live

Foundation — Sync Engine & Reports

● DONE **Printavo sync engine**
Orders, statuses, line items, customers mirrored to our database; incremental sync every 5 min, self-healing.

● YOUR TEST **Order detail + payments history + Reports API**
Backend done (2017→today payments, legacy Insights formulas). Awaiting your validation; Reports UI still to come.

Vendor Orders / Purchasing

● DONE **P1 — Needs-ordering scan**
Live view of items needing purchase, grouped by order.

● DONE **P2 — Cart, vendor pricing, PO builder & PO Log**
SanMar + S&S live pricing, warehouse auto-pick, append-to-PO, lock model, admin unlock (PIN).

● DONE **P3 — Push to Printavo + status rules**
Line-item write-backs, production file attach, printable PO links, status suggestion rules (staff confirms each).

● YOUR TEST **P4a/b — Electronic vendor ordering**
Submit POs directly to SanMar / S&S with dry-run preview, PIN gate, kill switch, double-order protection.

● PLANNED **P4c — Tracking dashboard**
Vendor order status/tracking lookups + submission history. Pairs well with the activity log idea.

● PLANNED **P4d — First LIVE vendor order**
You + partner, ~July 14. One unit, SanMar. I assist; nothing sends without you.

● PLANNED **P4e — Polish**
Cleanup pass after live test learnings.

Price Calculator (Breezy Quote port)

● DONE **PC1–PC4 — Full calculator**
Pricing matrices (+CSV import of your old exports), quote engine with exact legacy math, 10-column breakdown, vendor price lookup popup with sale toggle & smart search ("bella 3001", "sport tek 350"), PNG export.

Print Queue (Workorder Manager port)

● YOUR TEST **PQ1 — Manual workorder printing**
Status filters, presets, combined print preview with per-order exclude, attachments toggle, packing-slip links.

● YOUR TEST **PQ2 — Bulk status change + queue rules**
Safe bulk moves (stale-order guard), rules engine with off/ask/auto modes, kill switch (default off).

● YOUR TEST **PQ3a — Auto-print to PrintNode**
Scheduled printing of new workorders + auto status move by decoration type. Fully verified end-to-end incl. double-print protection. Safe state: off + dry-run. Test with order #22251 only.

● PLANNED **PQ3b — Packing slips & box labels**
Rendered from our own data, no Printavo fetch.

Tabled — Returning Later

● TABLED **Cross-vendor catalog search**
"Navy trucker hat" search across SanMar + S&S with images; built as an API your other app can also use.

Ideas — Logged, Not Scheduled

● IDEA **Outgoing activity log**
One audit trail of everything the Hub sends out (Printavo writes, vendor orders) — what, when, success.

● IDEA **Task management app integration**
Fold in your existing task app; explore Printavo tasks sync. Waiting on your docs/code.

● IDEA **Missive messaging portal**
Inbox view / messaging inside the Hub via Missive's API. Scope TBD.

● IDEA **Customer enrichment + color database**
Logo colors, top styles, category tags; color DB reusable for Breezy tweak app.

● IDEA **Public Reorder Portal**
Customer-facing reordering, after internal modules settle.

Before Going Live

● REQUIRED **Full staff login / authentication**
The API is currently open inside the workspace; must be locked down before deployment.

Next up when you're back: test Auto-Print (PQ3a) with order #22251 — page is in the sidebar under Production. Then the live SanMar order (P4d) ~July 14. Testing rule in force: order #22251 only; #19004 never again.
