Printavo Hub — Project Plan & Status

Mint Printworks · August 7, 2026 · One consolidated internal platform replacing 11 separate Printavo-connected apps

● **DONE** built, tested, reviewed ● **YOUR TEST** done, waiting on Tyler to validate ● **WAITING** blocked on outside answer/input
● **DRAFTED** plan written, awaiting your acceptance ● **TABLED** paused, will return ● **BACKLOG** logged, not scheduled ● **READY** unblocked, your call

Punch List — what's waiting on you

1. **Product Curation Tool (new this week):** three plans drafted in the tasks panel — review & accept to start. Phase 1 (cross-vendor stock checker) is the quick win; foundations already exist under the PO builder.
2. **Mint Bucks email images (new Jul 31):** try the reward-rule & credit image uploads and the "send test email" button (test emails all come to you). If you ever retire the standalone MB app, re-upload its images in the Hub first.
3. **moMINTum standalone update pack:** forward the combined handoff doc (invoice links + task counts, with context primer) to your standalone app's agent when ready.
4. **Standing items from Jul 25:** Print Queue (PQ1–PQ3b incl. restyled packing slips), Client 360 browsing, Ask AI questions/presets, Chipply real-store import + support answer, Shipping tools live checks, Mint Bucks page click-through — all still awaiting your validation.
5. **Mint Bucks go-live decisions:** email mode still test (everything routes to you; one env-var flip when ready) and the poller-ownership flip (MB5) stays parked until you say go.
6. **Publish the Hub** whenever you give the word — production database steps (new tables since last publish check) are handled as part of publishing.

Foundation — Sync, Backup & Reports

● DONE **Printavo sync engine + speed overhaul**
Everything mirrored to our database. Recent changes land within one 5-min tick; manual Sync Now ~70s; deep re-checks nightly.

● DONE **Global sync bar** NEW — built Aug 7
"Printavo synced X min ago" + Sync Now button now atop EVERY Hub page (was Vendor Orders only). Finishing a manual sync refreshes whatever page you're on.

● DONE **Complete Printavo backup**
Full history to Feb 2018 (~19k orders), payments to Dec 2017, messages/inquiries/payment requests/merch stores/reference data, order files mirrored to our cloud storage, one-click ~61 MB JSON ZIP export. Known limits: pricing-matrix cells not exposed by API; packing slips login-walled.

● YOUR TEST **Order detail + payments history + Reports API**
Backend done (2017→today payments, legacy Insights formulas). Reports UI + your preset-reports list still to come.

Product Curation Tool NEW — drafted Aug 7

● DRAFTED **Phase 1 — Cross-vendor stock checker**
Style search across SanMar + S&S at once, color pick, size × warehouse live inventory grid with cost, cross-vendor style aliasing (G500 vs 5000), multi-select (men's + women's), and check-a-Printavo-invoice mode. Vendor lookups already exist under the PO builder.

● DRAFTED **Phase 2 — Descriptive search + color families**
Our own local catalog of both vendors' lines, refreshed nightly (prices/colors/styles; your tag fixes survive; health panel). AI tags color families & garment attributes once at import — "forest green polos" or "light blue" searches run instantly. Inventory never cached, always live. Also the foundation for the color catalog + key-authed catalog API backlog items.

● DRAFTED **Phase 3 — Collections & customer curation**
Star styles into named collections, link to customers (shows on their profile), fresh stock re-checks, send-to-Price-Calculator. Future follow-ons flagged: templated sell sheets, push collection onto a Printavo invoice, shared customer links.

Client 360

● YOUR TEST **Directory + niche categories + niche report**
All ~3,565 customers, biggest spenders first. Assign niches inline or in bulk; keyword search looks INSIDE order nicknames with select-all-matching. Niche report uses invoice-only revenue (~$10.4M all-time).

● YOUR TEST **Customer profiles**
Lifetime/YTD spend, order frequency, avg pieces, top styles, decoration-method breakdown, order history, contacts, niche. (Branding colors/artwork still deferred.)

Ask AI

● YOUR TEST **Plain-English questions over all Hub data + saved presets**
AI writes a read-only query under strict guardrails, answers with the table + SQL shown. Save any answer as an instant preset. Verified: June 2026 = $120,058.66.

Chipply Web Stores

● YOUR TEST **Store imports — email paste + CSV uploads**
Paste a "Web Store Closed" email or upload SalesReport / Margin Report CSVs; editable review step before saving.

● YOUR TEST **Live Printavo linking + clean revenue separation**
$0 merch shells link themselves via nickname convention; "Detected in Printavo" lists ~295 not-yet-imported groups. Chipply dollars never mix into Printavo revenue; excluded production gets its own profile block. Real method tokens: EMB / HEAT / PRINT.

● WAITING **Chipply support answer**
Scheduled export emails or data feed? Best case makes imports hands-off; the import page is reused either way. CH2 (profile section, reporting, CSV imports, reassignment) confirmed as next Chipply step after your CH1 test.

Vendor Orders / Purchasing — COMPLETE

● DONE **P1–P4 — Scan, cart, PO builder, Printavo push, electronic vendor ordering + tracking**
Needs-ordering scan, SanMar + S&S live pricing, warehouse auto-pick, PO Log with locks, write-backs, status suggestions. Live orders proven with BOTH vendors. PIN gate, kill switch, double-order protection, tracking dashboard.

Price Calculator (Breezy Quote port) — COMPLETE

● DONE **PC1–PC4 — Full calculator**
Matrices (+CSV import), exact legacy math, 10-col breakdown, vendor price lookup with sale toggle & smart search, PNG export.

Team & Access

● DONE **Staff login & roles**
Google/email sign-in, staff allowlist, admin vs staff roles, staff management in Settings, admin PIN in app settings.

● YOUR TEST **moMINTum task app inside the Hub**
Full task manager, same live database as the standalone app. Staff-gated; one-click nav both ways.
Standalone catch-up (Aug 3): combined update pack written (invoice links + task counts, with context primer) — ready for you to forward to the standalone app's agent; all 8 handoff docs indexed in handoffs/.

Printavo ⇄ moMINTum Task Sync

● YOUR TEST **Two-way task sync — LIVE, auto-polling every 5 min**
Smart routing, completions flow both ways, deletions clean up twins, safeguard pop-ups on Printavo-linked tasks.
Rule: auto-sync flag lives in ONE environment only (currently dev) — never both, or tasks duplicate.

Mint Bucks — store credit

- YOUR TEST **Full port — 12 pages, same live database**
  Reward/order poller stays OFF in the Hub until you flip ownership. Emails redirect to you ([TEST→…]) until email mode goes live. MINTBUCKS_APP_URL now set; Resend connected.
- YOUR TEST **Branded email images + test emails** NEW — built Jul 31
  Upload images on reward rules & credits (shown in reward/reminder emails) and send yourself a test email from any rule. Images uploaded in the standalone app keep working in Hub emails while that app stays published; retire it → re-upload once in the Hub.

Print Queue (Workorder Manager port)

- YOUR TEST **PQ1 — Manual workorder printing**
  Status filters, presets, combined print preview with per-order exclude, attachments toggle, packing-slip links.
- YOUR TEST **PQ2 — Bulk status change + queue rules**
  Safe bulk moves (stale-order guard), rules with off/ask/auto modes, kill switch (default off).
- YOUR TEST **PQ3a — Auto-print to PrintNode**
  Scheduled printing + auto status move by decoration type. Double-print protection verified. Safe state: off + dry-run. Test with order #22251 only.
- YOUR TEST **PQ3b — Packing slips & box labels**
  Near-clone of Printavo's public template: QR code, logo + shop block, billing/shipping columns, per-group size-matrix tables. Rendered from our own data.

Shipping

- YOUR TEST **Rate Estimator ("shipstimator")**
  USPS/UPS quotes from ShipStation + EasyPost side-by-side, weight calc, preset boxes, smart paste for addresses.
- YOUR TEST **Slip / Label Sorter**
  Sorts packing slips Style→Color→Size→Order# and pairs the USPS label PDF 1:1, + match report. All 9 presets + custom sort builder.

Tabled — Returning Later

- TABLED **Branding / artwork / Dropbox on profiles**
  Customer branding colors + artwork references — deferred when Client 360 shipped; slots into the existing profile page.
- DONE **Cross-vendor catalog search → un-tabled**
  Absorbed into the Product Curation Tool (Phases 1–2 above); the key-protected API for your other app rides on the Phase-2 catalog.

Going Live

- READY **Publish the Hub**
  Your call. Production database needs the tables added since the last publish check (Chipply, insights presets) — handled as part of publishing. Task-sync auto-poll flag is dev-scoped, so publishing stays safe.

Backlog & Ideas — Logged, Not Scheduled

CFO AI assistant NEW Aug 7
Analyst agent over Printavo data + imported payroll/labor + email effort. Three layers: financial intake → tunable order cost model (stitches/colors/qty as labor proxies) → scheduled advisory digests + chat, on the Ask AI guardrails.

Email correspondence hub NEW Aug 7
Read-only Gmail monitoring of CSR inboxes; emails mapped to customers (exact) and invoices (suggest + confirm). Track replies, not opens — read receipts unreliable industry-wide. Feeds the CFO agent's ROI data.

Color catalog / database
Hub-built color DB, reusable for the Breezy app — now naturally rides on the curation Phase-2 catalog.

Knowledge base — FAQ, SOPs, reference
Centralized internal docs, structured for AI & platform integrations to use.

External analytics hub
Fireflies, JustCall, Google Analytics/AdWords, Meta, RB2B, EmailAnalytics, ActivTrak, Constant Contact… roles in place for access tiers.

Sales & follow-up tools
Proactive follow-up reminders, receivables tracking, custom alerts — get much smarter once the email hub exists.

Preset reports library
Batch of ready-made reports — working from your list. (Ask AI presets already cover the ad-hoc cases.)

Maintenance & sidework log
With scheduled reminders; may tie into moMINTum.

Outgoing activity log
One audit trail of everything the Hub sends out — what, when, success.

Missive messaging portal
Inbox / messaging inside the Hub via Missive's API.

Public Reorder Portal
Customer-facing reordering, after internal modules settle.

Orders report / dashboard shell counts
Chipply shells still inflate the general Orders report + dashboard counts — parked for a decision.

Since last report (Jul 25): Mint Bucks branded email images + test-email sending shipped · moMINTum standalone update pack written (ready to forward) · global Printavo sync bar on every page · Product Curation Tool planned in 3 phases (drafted, awaiting your acceptance) — absorbs the tabled catalog search + Aug 4 stock-checker idea · two new ideas logged & assessed: CFO AI assistant, email correspondence hub. · **Testing rule in force: order #22251 only; #19004 never again.**
